

KOBEL

Table Collection

Kobel is a collection of design-led office and workspace tables that combine impeccable craftsmanship with innovative design. Choose from two distinct options: a dining table height or a high table height, allowing you to create a workspace tailored to your specific needs. Both options are available with either a Gantry overhead frame for a modern touch or a standard table frame for a classic aesthetic. Additionally, select a full metal frame or opt for wooden legs, giving your table a personalised touch that reflects your style and taste.

There are also additional options to enhance your workspace experience, such as the PET Felt screen, designed to boost concentration and minimise distractions. This screen not only defines your workspace but also creates a sense of privacy, enabling you to stay focused and productive.

Immerse yourself in our standard range of finishes, meticulously crafted to deliver exceptional quality and durability. Kobel ensures that your workspace not only functions flawlessly but also evokes a positive emotional response, elevating your office experience to new heights.

Created as a Design for Disassembly product, Kobel has sustainability at the core of its inception. It is a truly circular design, allowing the product to be dismantled for re-use, refurbishment or relocation, through a well-engineered build structure and material application.

Design

ØRN

Our Design Team approach each project with creativity and functionality at the heart of the brief. The team represent the companies' ambition to create and bring to market products of the highest quality, whilst paying close attention to the small details that make a product both memorable and distinguishable.

Based in our Banbury office, the team work with all departments within the business and our manufacturing partners to consistently deliver every piece with the original vision and direction imagined during the product's inception.
