

LORIA

Chair & Stool Collection

Introducing Loria, an exquisite seating collection that combines contemporary design aesthetics, exceptional craftsmanship, and high levels of versatility. With a monoshell form and a captivating color palette of soft, warm hues, Loria brings a sense of refined luxury to any space.

Crafted with meticulous attention to detail, Loria's sleek lines and fluid forms exude grace and sophistication, while the option for an upholstered seat pad gives you the option of even further comfort. Whether it's in work-café's, breakout spaces, formal meeting areas, or visitor seating, Loria effortlessly adapts to various settings, enhancing your space with its captivating presence.

WE BELIEVE IN SUSTAINABLE DESIGN

Throughout our production processes, there is a strong emphasis on minimising the use of raw materials, optimising resource utilisation, repurposing or recycling waste materials, and maintaining strict control over emissions. The focal point of ensuring sustainability lies in creating enduring products that excel in both aesthetics and durability. From its initial design stages, the Loria collection is meticulously crafted to facilitate disassembly when a component needs replacement, thus mitigating unnecessary consumption.

 Loria Warm Grey 100% Recycled Plastic

The Loria collection incorporates premium raw materials that possess outstanding quality while being recyclable and eco-friendly. The Warm Grey colour option is specifically composed of a blend of 50% post-consumer plastic waste and 50% post-industrial plastic waste, both derived from different sources. Post-consumer waste primarily comes from products previously used by consumers, such as plastic bottles or food packaging, while the industrial component consists of waste plastics such as containers and plastic films.

 Loria Warm Grey 100% Recycled Plastic

Loria is part of our re-use, re-location or recycle design principle
